

Keyhole Surgery

Keyhole surgery is common in humans and Parkside can now offer this for bitch spays. Fraser Goldie has had specialist training in this field and surgery done in this way provide a quicker recovery with less discomfort post-operatively for your dog. It is only suitable for medium and large dogs due to the limiting size of the specialised laparoscopy instruments. The operation is viewed on and manipulated via the high definition screen using long instruments. Two small incisions are all that's left to heal.

Gigi at home two hours after her surgery.

New Records System

Spring 2017 sees an upgraded computerised record system at all three Parkside surgeries for you and your pets. This investment will allow better, accurate recalls for vaccinations, worming, flea prevention and the like for your pet. On-line booking of appointments for your pets will be a popular bonus of this new system and excellent integration of laboratory results and Xray findings will keep results accurately and securely within your pets' records, viewable from every surgery.

This will fit in well with the expansion of the Dundee surgery later in the year to give more consulting and operating rooms and more comfortable extended kennelling for your pets. Separation of cats and dogs from the time of consulting to operating and kennelling will also be possible, leading to calmer, more settled felines. This, along with the new Barnhill surgery, compliments our plans for the best veterinary expertise in our area.

Dental X-rays are now available for dogs and cats undergoing dentals at Parkside, allowing for accurate diagnosis and treatment of dental and mouth problems.

Dundee 5 Kings Cross Road **810777**

Barnhill 58 Dalhousie Road **739634**

Phone usual number in an emergency

Did You Know?

Broughty Ferry surgery has had a facelift! Still in Lawrence Street, along from M & S Foodhall, with the same friendly staff and veterinary expertise.

New laparoscope at Parkside can be used for keyhole spays in medium and large dogs

Parkside vets have more experience than most practices, with 257 years of experience between all 20 vets.

New computer system is here for your pets' records. More secure, accessed anywhere.

Long, well-staffed consulting hours mean you have the choice of over 200 appointment slots every day between our three surgeries.

Specialised dental Xray machines now available for your pets dental needs.

Our advanced laboratory equipment means we can run most tests immediately and have results for you (and your pet) without delay.

Why not leave a review of your experiences with us - click on the review button on our web site or Facebook page. If you are happy, tell everyone. If you are not happy tell us so we can help.

Contact details?

Update your email address and/or mobile number and receive reminders when worming or flea treatments are due. You can even use the form on the web site.

Nurse Clinics

Nurse clinics can provide you with free advice on weight loss, feeding and half-price procedures like nail clipping.

Nurses often re-dress wounds on your pets, remove sutures and clean and medicate ears and other procedures.

Parvovirus in Dogs

We still see cases of 'Parvo' in the practice, especially in youngsters and the easy way to avoid it is to vaccinate and keep them protected with annual booster vaccinations.

Spring Offers

It's that time of year again when the beasts start to become active and our pets suffer. Fleas and ticks are more common than ever, especially with milder winters and we recommend that you prevent these in dogs and cats using the most effective treatments available. One product can now last for three months after one treatment, both for dogs and now also for cats. Parkside **Special Offers** will be available for these products over the Spring months, so look out for these when you visit your surgery.

Parkside Specialities

Parkside provides specialist orthopaedic care from Stuart Ashworth for fracture repairs and lameness investigations. Stuart is an *Advanced Practitioner in Small Animal Orthopaedics* and we receive referrals from other vets as well as caring for *Parkside* pets. Fraser Goldie is an Advanced Practitioner in Small-Animal Surgery, also offering further expertise in orthopaedics but also complicated soft-tissue surgery. He is now trained for laparoscopic procedures too (keyhole surgery).

In addition, we can provide ultrasound examination using high-definition machines (and highly-trained vets) - ideal for non-invasive methods of examining the abdomen and heart - as well as endoscopic examination with our video-endoscope - good for investigating the gut and airways without surgery and we can now do arthroscopy, to look inside joints, often avoiding major surgery and as an aid to diagnosis. Speciality training within the practice gives your pets even more options if the need arises and often avoids the inconvenience of referral to large university centres. Parkside staff all undergo ongoing training to keep ahead and keep up to speed with new developments, keeping standards high and giving your pets the best care from trained professionals.
